

# iPad APPS Secondary School

## REQUIRED LIST FOR COMMENCEMENT OF 2013

### INFORMATION

The following is the list of Apps that are required to be purchased for your child to use at the College in 2013. The list is comprehensive and takes into account each of the Learning Areas, as well as, the general Apps that are used across the curriculum.

### Free Apps

A number of free apps have been added to this list that the students will need to have access to next year.

### Compulsory Applications

The College has researched and tested a number of paid Apps during the past 12 months and has finalised a list of applications that will need to be purchased for the start of 2013.

These Apps cover a range of different Learning Areas and may not all be used at the same time in the same way, but will be integrated during the year for various topics and content.

In some cases families may have already purchased a copy of an application under a family account. In these cases families will need to decide whether they use this account for their son/daughter or create a new one and purchase the applications again. A third option is available where parents may have two Apple ID accounts used on the one iPad. If this is the case please refer to the video on the College website for management of these accounts.
